4 inch extra long strainer

Extra-long strainer that protects pumps and valves from debris.

Overview

A strainer is a screen in the pipe that catches particles before they reach pumps, valves or instruments. The extra-long basket gives a larger screen area and longer intervals between cleaning, which keeps the system running at steady flow.

Key features

- Large screen area, longer time between cleaning
- Protects pumps, valves and meters
- Removable basket for quick cleaning
- Corrosion-resistant construction
- 4 inch line size

Typical applications

- Pump suction protection
- Raw water lines
- Cooling water systems
- RO pre-treatment lines

Typical specifications

Line size	4 inch (DN100)
Body	UPVC, or SS on request
Basket	Perforated or mesh, stainless steel
Connection	Flanged or socket
Mesh	Chosen to the particle size to be stopped

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
