Cooling tower chemical

Scale, corrosion and biological control for cooling water.

Representative illustration. Actual product may differ.

Overview

Cooling water systems can scale, corrode and grow slime and algae. A programme of scale and corrosion inhibitors and biocides keeps heat exchangers clean and equipment safe. We supply the chemicals and the dosing advice.

Key features

- Scale and corrosion inhibitors
- Biocides for slime and algae
- Dosing advice for your cycles of concentration
- Supplied in drums
- Regular supply from stock

Typical applications

- Cooling towers
- Chilled water loops
- Heat exchangers
- Industrial cooling systems

Typical specifications

Range	Scale and corrosion inhibitor, biocide
Form	Liquid
Pack	Drums and cans
Dosing	By dosing pump, set to make-up water

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
