Rotameter, inline model

Inline flow indicator fitted directly in the pipe.

Overview

The inline rotameter is fitted straight into the pipeline, which makes it a neat choice where there is no panel. The float and scale give the flow at a glance, with no power and nothing to configure.

Key features

- Fits directly in the pipeline
- Simple and dependable
- No power needed
- Clear scale in litres per hour
- Plastic or metal bodies

Typical applications

- RO feed and reject lines
- Chemical dosing lines
- Filter backwash lines
- Process water lines

Typical specifications

Principle	Variable-area float
Mounting	Inline, vertical
Scale	Litres per hour or per minute, per model
Connection	Threaded or flanged
Body	Acrylic tube or metal

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
