Multiport valve (IEI)

IEI multiport valve for filters and softeners.

Overview

The IEI multiport valve gathers the flow paths of a filter or softener into one body, so one handle sets service, backwash and rinse. It is supplied for new vessels and as a replacement on existing plants.

Key features

- One valve for every operating position
- Straightforward to operate and maintain
- Replacement valve for existing vessels
- Manual and automatic options
- Spares and service support

Typical applications

- Sand and carbon filters
- Softeners
- Valve replacement on older plants

Typical specifications

Modes	Service, backwash, rinse, regeneration
Operation	Manual or automatic
Fit	Top-mounted on filter and softener vessels

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
