Multiport valve (UKL)

UKL multiport valve for manual or automatic filter operation.

Overview

The UKL multiport valve controls a filter or softener vessel through one body with several marked positions. It is a long-standing, rugged choice for industrial filters and softeners.

Key features

- Rugged, simple to operate
- All backwash and rinse positions in one valve
- Suits industrial filters and softeners
- Manual and automatic options
- Spares and service support

Typical applications

- Industrial sand and carbon filters
- Softener plants
- Pre-treatment for RO and DM

Typical specifications

Modes	Service, backwash, rinse, regeneration
Operation	Manual or automatic
Fit	Top-mounted on filter and softener vessels

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
