Water test kit

Field kit for quick checks of hardness, chloride, pH and more.

Overview

A water test kit lets the operator check key values without a lab: hardness, chloride, alkalinity, pH, iron and residual chlorine. Quick checks on site help catch a problem before it reaches the plant.

Key features

- Quick checks without a lab
- Hardness, chloride, alkalinity, pH, iron
- Compact case, easy to carry
- Refill reagents available
- Instructions on each reagent

Typical applications

- Softener plant checks
- RO feed and permeate checks
- Boiler water tests
- Field survey visits

Typical specifications

Tests	Hardness, chloride, alkalinity, pH, iron, chlorine (by kit)
Method	Colour change or titration
Case	Carry case with reagents and accessories
Refills	Reagents supplied separately

Values are typical, for reference. The final specification is confirmed in our quotation, against your flow, pressure and water analysis.
